PROFESSIONAL SUMMARY

Flutter Developer with 1+ years of experience building scalable, high-performance cross-platform apps. Expert in Clean Architecture, BLoC, and REST APIs, committed to writing clean, production-ready code following SOLID principles.

TECHNICAL SKILLS

- **Flutter & Mobile:** Flutter SDK, Responsive & Adaptive UI, Custom Widgets, Animations, Performance Optimization.
- **Architecture & Scalability:** Clean Architecture, MVVM, MVI, Feature-First Architecture, SOLID Principles, Design Patterns, Dependency Injection.
- **State Management & DI:** BLoC, Cubit, Provider, get_it, injectable, Service Locator.
- **Backend & Integrations:** REST API Integration, Dio, HTTP, Firebase Authentication, Cloud Firestore.
- **Local Storage:** SharedPreferences, Flutter Secure Storage, Hive.
- **Dart Advanced:** Async / Await, Futures, Streams, Isolates, Mixins, Extensions, Generics, Records & Patterns, Null Safety.
- **Testing:** Unit Testing, Widget Testing, Integration Testing.
- **Version Control & DevOps:** Git, Git Flow, GitHub, CI/CD, GitHub Actions.
- **Collaboration & Tools:** Agile Methodology, Scrum, Jira, Slack, Figma, Postman, Code Review.

PROFESSIONAL EXPERIENCE

Flutter Instructor, [IEEE Benha University Branch](#) (2026 Season)

Delivered technical sessions on Flutter and Dart, mentored students through practical projects, and guided code reviews.

Flutter Trainee, [National Telecommunication Institute \(NTI\)](#) (5-Month Internship)

Built scalable mobile apps using Clean Architecture, BLoC, REST APIs, and Firebase within Agile teams.

Flutter Trainee, [Information Technology Institute \(ITI\)](#) (4-Month Internship)

Developed production-ready mobile apps applying advanced software engineering standards.

Flutter Trainee, [GDG On Campus Benha](#) (2026 Season)

Participated in intensive workshops and collaborated with peers on building real-world mobile applications.

PROJECTS

[Rentora – AI-Powered P2P Rental Marketplace](#) 

Built a scalable team-based rental marketplace using Clean Architecture, BLoC/Cubit, Firebase, AI-powered smart search, real-time chat, geolocation, and secure identity verification.

[Shopping Mobile Application \(API-Based \)](#) 

Developed a scalable team-based shopping app using Clean Architecture, MVI, and BLoC for robust state management..

[Bazar Mobile Application \(API-Based \)](#) 

Built a modular e-commerce app featuring cart management, checkout workflows, and seamless REST API integration.

[Aura AI - AI Chat Mobile Application \(API-Based \)](#)

Developed an AI-powered chat app featuring real-time streaming responses via Groq API.

[Real-Time Chat Mobile Application \(Firebase-Based \)](#)

Built a live messaging app powered by Firebase Authentication and Firestore streams for instant synchronization.

EDUCATION

B.Sc. in Computers and Artificial Intelligence | [Benha University](#)

Department / Focus: Software Engineering, Object-Oriented Programming, Data Structures, Algorithms, Databases, and Mobile Application Development.
